

# DENNIS CHOI

WEB DEVELOPER

## ABOUT ME

Hi! I'm Dennis. I'm an exuberant builder and creator of ideas and rockets, and coincidentally also a Web Developer. While I may be a Ping-pong and basketball loving connoisseur, coding is my trait and the vast array of opportunities stemmed from it keep me on my toes. To me web development is the foundation to where my lines of code make creative thought bubbles (ideas, see what I did there?) come to life.

### PROJECTS

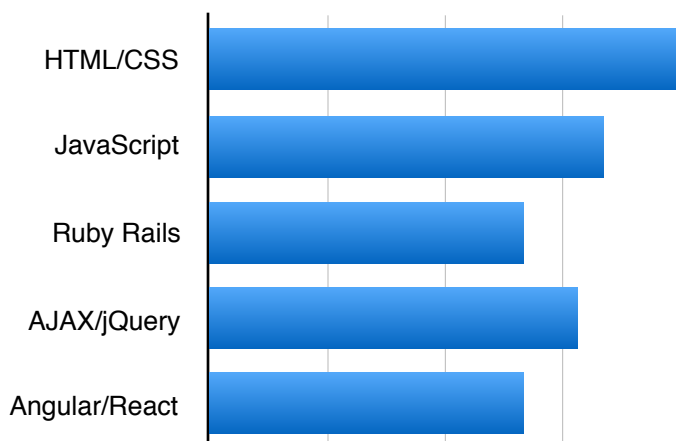

**Clientdesk** >> Digitizing the Insurance world with a platform & app that integrates with BMS data. Role: Front-End Developer (HTML/CSS, Angular, React, Bootstrap).

**Scout&Gather** >> Gallery for local Toronto furniture company to extend media presence to audience and clients. Role: Full Stack Development (Ruby/Rails, JavaScript).

**Lee Basketball** >> Local Toronto basketball agency. Role: Wordpress Developer

**Dindr** >> A game that helps you decide what to eat (and matches you onto dates with similar cravings). Role: Back-end (Ruby/Rails, JavaScript) and Front-end (JavaScript, AJAX, Sass, Bourbon).
